

BRINGING SUPERFAST BROADBAND TO OUR RURAL AREAS

Last month we wrote about the project to bring superfast broadband to our rural areas. This is now progressing well. Almost 200 Local Broadband Champions have been recruited, working in their local communities to literally help put their area on the broadband map.

Our Local Broadband Champions for **XXX** are **XXX (give contact details)**

Over the coming weeks they will be posting flyers through your door to let you know how you could help bring faster broadband to **XXX**

Or

We are looking for Local Broadband Champions to help bring improved speeds to **XXX**. If you have some time to spare and would be interested in helping improve our local broadband speed please email your name, address (with postcode), telephone number and area you wish to cover to broadband@warwickshire.gov.uk

We need to show that there is a high level of demand for improved broadband in our area. In order to do this please complete the on-line surveys at <http://www.cswbroadband.org.uk/> - there is one survey for domestic use and one for business use, so if you run a business or work from home please do both – and encourage your neighbours to do it as well because the more people that respond from a given area the higher priority it will be.

We need to show a high level of return for the number of properties in our area – 100% return from a village of 100 properties is better than a 10% return from a village of 1000 properties, so please complete the survey today if you have not done so already.

A couple of minutes could make all the difference to our village getting superfast broadband!
